

Tuesday Oct 10th 1896

Well my Darling little Girl

I suppose that you are
settled back to your work by
this time, I hope that nothing
will come to upset you work
this winter as the time will
soon fly by & never to return
Remember your Father can't still
back weather Oh dear but that
is too bad we have had lovely
weather for the last two weeks
Papa thinks that you had better
have a pair of Artie seal shoes
for the winter as you had so
many colds last winter by
not having any heavy shoes what
do you say to that I tell him
that even if you had a pair of
such shoes that you would be
caught in a with out them
just the same for you would
say to you self Oh I guess it
will be fine to stay I will
were my light shoes & before
you get home your feet would
be cold as well as that not
so. However if you think it
worth while let us know what
of the shoes that we have sent
you fit you the best & we will
have a pair made on that
last the ones I sent by the
Sherman were made on
Davis last & the ties were

with Father were ⁽²⁾ supposed to
be made on the Can last
morn which do you like the
best make no mistake in
letting us know just what
mark is on the ones you like
best. Did you sell the ~~hand~~
shewing for the tax show
for that money. That ⁷⁵ would
go to wash you & wash clothes.
Did I tell you that Nellie Culbert
is my lab & not expected to get
better after her last baby
she went down very fast &
the only way, about 40 pa
now just think of it 5 babies
enough to kill any one. Let
alone one like her will
lose a good friend when
she passes away dear little
thing. Mrs Addington just called
with her two children one by
her first husband & one by
Mr Addington. I mean Ruth
& see from Fetter. We are
going down to see Theo tom
Lara. Theo has told you all
about. My Coleman's girl
I need not dwell upon it
am very sorry that for her
Alice, saw Alice yesterday
she is very busy sewing
making a dress, cheap one
what do you think of what
I said about you not spend-
ing any money on new
stuffs for yourself & see for the
winter but take some up
you a lot things & by a pair
all ready made good heavy
cloth & then you can use

any waist (3) under the
jacket & if the day is warm
& you want to call them you
can wear you for cape over
a silk waist & that is the
way it has been worn here
The sleeves are all warm
all now & I shall have to go
with mine as they are
I have just received them. I
must fit my green suit up
it did me good serves last
winter & in fact all summer
I wore the shirt with my
black cloth waist & you
will find more comfort in
the a suit than a long jacket
I am writing to see what
you can get me for over there
or get it & make the shirt
yourself & have the jacket
made at your weight to be
able to make the shirt in
a week for that is not very
much to it that is not any
fairing men only rustling
leaving & binding & sewing
a strip of lining over the
seams as far as the cupping
is stitched but if you can get
one made at a reasonable price
I would advise you to get it
all ready made. Papa says
Dr Clark the Dentist & the
asked after you & he stood up
for them we had never seen
him since the trouble & it
was a nice to hear him speak
so nice than you - Called Patton
in his baggage says that
in all the time he is a - has
eyes will not allow her to study

(4)
I hope you have been well & happy
& Mrs. Burnett I hope that you
will cure your fever of business before
you return as I think that it
looks nice to see a lady red.
Did I tell you that I had a
new little girl friend who has
just gone who has spent the aft-
ernoon with me she has a
beard & knows how to
express her thoughts she is go-
ing to give me some of her pro-
-duce I shall try & get her for
you to see her Miss N. cannot be
called & wants to be remembered
to you she says that if the
teachers are like what Cox
re says they are that she
thinks they must have a
despotic temper I told her
that you had always
spoken very well of your
teachers & she told some
one that they thought not
thing of taking a pupil by
the collar & flogging them
all around said I never heard
of it & did not believe it far
I would not leave you there
if you tell take it far what
it is worth what she says
say I think I ought to have
had you better to say from
my accounting you can know
all this & you would write
on Sunday & Post on Monday
& if you would give it 1/2 day
but if you it will come
in ~~the~~ tomorrow I hope so
I will send you some money
just as soon as I can get
some together again every one
is after some of the money
due them so I have to give
a little to catch to keep them
quiet must go now get down
write as I can to Mamma
